DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-9 and 17-19, drawn to the prosthetic joint device.

Group II, claim(s) 10-16 and 20, drawn to the method of implantation.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Both Pappas et al (US 4,470,158) and Buechel et al (US 4,309,778) show that the common technical feature is not patentable; see the International Preliminary Examination Report dated 04 September 2001 and the International Search Report dated 26 September 2000.

A telephone call was made to Richard Minnich on September 4 and 5, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made. Mr. Minnich requested that the restriction requirement be put in written form and mailed out.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

Art Unit: 3738

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
